## MEDICAL- DIODE LASER HAIR REMOVAL

Safely, quickly and effectively reduce hair permanently

- ◆ Smart Andriod Screen
- ◆ 15.6" display
- ◆ 4K HD monitor
- ◆ Automatic design

**A TREATMENT THAT IS EFFECTIVE, FAST AND COMFORTABLE**

It offers the synergistic benefits of the 4 most effective wavelengths for hair removal, each targeting different structures within the hair follicle. The 4 main anatomical targets include the bulge, bulb and papilla. With an improved patient experience and a business-oriented approach, it can create a unique and result-driven new solution in the world of professional hair removal.

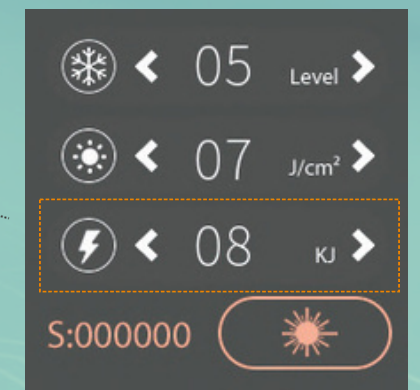

**Efficacy:**  
Laser energy delivered more efficiently.

**Safety:**  
Lower fluence is required per pulse.

**Decreased pain:**  
Unique mechanism reduces pain during treatment.

**Treatment time:**  
Rapid coverage rate without gel or anesthesia. Quickly and comfortably.

90° rotation

**SCREEN LINKAGE**

Handle screen intelligent linkage  
Touch screen of handles, directly adjust parameters  
Convenient and fast operation

# HANDLE FOUR WAVELENGTHS

Allowing you to customize laser hair removal treatments for all skin types

755nm

755nm recommended for treating pale skins (phototypes I- III) with fine hair. Indicated for removing the residual hair of the last sessions. With more superficial penetration, the 755nm wavelength targets the Bulge of the hair follicle and is especially effective for superficially embedded hair in areas such as the eyebrows and upper lip.

808nm

808nm recommended for treating all skin phototypes, particularly patients with a great density of hair and first sessions. Its deep penetration capabilities target the Bulge and Bulb of the hair follicle while moderate tissue depth penetration makes it ideal for treating the arms, legs, cheeks and beard.

940nm

940nm wavelength effectively penetrates deep and absorbed by the target chromophore. The adequate pulse duration, energy density and epidermal cooling ensure an sufficient thermal damage to the target tissue without damaging the surrounding tissue to achieve effective hair removal.

1064nm

1064nm indicated for treating dark phototypes (III-IV tanned, V and VI). The 1064nm offers the deepest penetration of the hair follicle, allowing it to target the Bulb and Papilla, as well as treat deeply embedded hair in areas such as the scalp, arm pits and pubic areas.

### TECHNICAL SPECIFICATIONS:

Laser type	755/808/940/1064nm 4 wavelengths
Display system	15.6 inch true color touch screen
Laser handle shots	80-100 millions shots
Cooling system	Air + Water + Double TEC Semi-Conductor + Annular cooling Chip
Spot size	15*15mm/ 15*30mm; Diameter 8 mm (Optional)
Power requirement	AC220/110V, 50/60HZ

  
Ice Cooling Effect

  
All Skin Color

  
Safe and Painless

  
Multi-size Spot

  
80-100 millions shots

  
4 Highly Effective Wavelengths

  
Permanent Hair Reduction

  
Mode Selectable Men and Women

”

I have treatment for my whole body, this laser only takes 20 mins. Amazing fast hair removal and feeling very comfortable. HABITUS is really great!

”

”

It was a pleasure dealing with HABITUS. I have received a good laser machine and reasonable pricing. I have a good support, although did not have the needs for any repairs of my devices. I would recommend their services / devices.

”

”

I'm from UK. I have now purchased 5 lasers from HABITUS. The first purchase was in 2016 and that laser is still going strong with excellent results and no service calls to date. I really like their lasers!

”
